About This Game

Langoth (Old English) means a very specific yearning, when a person had a vision of Paradise – and it was gone, but the rest of his life he was looking for it reflections.

The world around you is not real - it's only a high-quality multi-level simulation. Due to a virus attack on the basic simulator system, the program was corrupted and all living entities disappeared from the world and have been replaced with virus cells, eating the remains of the matter.

Hope fades by the minute, and the higher beings are planning to reset the simulation, beginning the long process of evolution all over again. If that happens, the world will never be the same.

Simply changing the basic code while it's being run is no longer possible, but fortunately, all is not lost! You, a being from the outside world, have been sent as a drastic last resort to clear the viruses from inside the simulation.

Will you be able to accomplish your mission and restore life on Earth as it was once before?

Features:

- Three large locations (and one secret location)

- Various secret places

- A variety of generated enemies

- Bombs!

- Beautiful stylized graphics powered by Unreal Engine 4

- Arena mode

really

bad. If Jared Leto made a video game, this would be it.

If a headache could be digitized, this would be it.

If a bad LSD trip could be turned into polygons, this would be it.

If boredom could be made into gigabytes, this would be it.

If an idiot wasted a dollar on this game, it would be me.. One of the worst things in my library, if not the worst. Barely possible to do much beacuse of how innacurate the movement is, looping music, and a pointless existence. What fun! DO NOT BUY THIS CRAP.. Sonic Boom and Temple Run had an oxygen-deprived baby and this is the result: an un-optimized meme.

The game might only be $2.99 but that Double Cheeseburger and soft drink you could've gotten at McDonalds would've been so much better.. never before played a game of this kind - third person runner.

you run and jump like in any platformer game, but in full 3D, with third person view.

i want to specially admit not some general "graphics", its quite ok, but looks rather usual for game that is made with unreal engine, but WHAT was made - lots of really interesting different beautiful fantastic worlds and interiors, each looking differently and having its own nature.

game has interesting tasks you cannot just pass immediately, you need to try and to try again, though it looks simple, third person view makes many tasks more difficult.. \u043f\u0440\u0438\u043a\u043e\u043b\u044c\u043d\u044b\u0439 \u0431\u0435\u0433\u043e\u0432\u043e\u0439 3\u0434 \u043f\u043b\u0430\u0442\u0444\u043e\u0440\u043c\u0435\u0440 - \u0442\u044b \u0431\u0435\u0436\u0438\u0448\u044c, \u0431\u0435\u0436\u0438\u0448\u044c, \u0431\u0435\u0436\u0438\u0448\u044c, \u0441\u043e\u0431\u0438\u0440\u0430\u0435\u0448\u044c \u0444\u0438\u043e\u043b\u0435\u0442\u043e\u0432\u044b\u0435 \u043a\u0440\u0438\u0441\u0442\u0430\u043b\u043b\u044b, \u043f\u0440\u044b\u0433\u0430\u0435\u0448\u044c, \u0431\u0435\u0436\u0438\u0448\u044c, \u0441\u043e\u0431\u0438\u0440\u0430\u0435\u0448\u044c \u0431\u043e\u043c\u0431\u044b, \u043f\u0440\u044b\u0433\u0430\u0435\u0448\u044c \u0431\u0435\u0436\u0438\u0448\u044c \u043f\u0440\u044b\u0433\u0430\u0435\u0448\u044c, \u043f\u0440\u044b\u0433\u0430\u0435\u0448\u044c, \u0443\u043f\u0440\u0430\u0432\u043b\u0435\u043d\u0438\u0435 \u043e\u0442 \u0442\u0440\u0435\u0442\u044c\u0435\u0433\u043e \u043b\u0438\u0446\u0430 \u0432\u043d\u043e\u0441\u0438\u0442 \u0441\u0432\u043e\u0438 \u043f\u0440\u0430\u0432\u043a\u0438 - \u043a\u0430\u0437\u0430\u043b\u043e\u0441\u044c \u0431\u044b \u044d\u043b\u0435\u043c\u0435\u043d\u0442\u0430\u0440\u043d\u044b\u0435 \u0437\u0430\u0434\u0430\u0447\u0438 \u0441\u0442\u0430\u043d\u043e\u0432\u044f\u0442\u0441\u044f \u0438\u043d\u0442\u0440\u0438\u0433\u0443\u044e\u0449\u0438\u043c\u0438, \u0434\u043e\u0441\u0442\u0430\u0442\u043e\u0447\u043d\u043e \u0442\u0440\u0443\u0434\u043d\u044b\u0435 - \u0441\u043e\u0432\u0441\u0435\u043c \u0442\u0440\u0443\u0434\u043d\u043e\u0432\u044b\u043f\u043e\u043b\u043d\u0438\u043c\u0438 - \u0438\u043d\u0442\u0435\u0440\u0435\u0441\u043d\u043e. \u043d\u0443 \u0438 \u043f\u043b\u044e\u0441 \u0444\u0443\u0442\u0443\u0440\u0438\u0441\u0442\u0438\u0447\u0435\u0441\u043a\u0438\u0439 \u0432\u0438\u0434 \u0433\u043b\u0430\u0432\u043d\u043e\u0433\u043e \u0433\u0435\u0440\u043e\u044f, \u043d\u0435\u0440\u0435\u0430\u043b\u044c\u043d\u043e \u0444\u0430\u043d\u0442\u0430\u0441\u0442\u0438\u0447\u0435\u0441\u043a\u0438\u0435 \u043c\u0438\u0440\u044b, \u043f\u043e\u0445\u043e\u0436\u0438\u0435 \u043d\u0430 \u0441\u043a\u0440\u0438\u043d\u0448\u043e\u0442\u044b \u0441 \u043d\u043e\u0443 \u043c\u0435\u043d \u0441\u043a\u0430\u0439, \u0445\u043e\u0440\u043e\u0448\u0430\u044f \u0434\u0438\u043d\u0430\u043c\u0438\u043a\u0430 - \u0438\u0433\u0440\u0430 \u0441\u0442\u043e\u0438\u0442 \u0441\u0432\u043e\u0438\u0445 \u0434\u0435\u043d\u0435\u0433.

Sonic Boom and Temple Run had an oxygen-deprived baby and this is the result: an un-optimized meme.

The game might only be $2.99 but that Double Cheeseburger and soft drink you could've gotten at McDonalds would've been so much better.. I got this game as an extra in a bundle, so I didn't pay attention to what it actually was before launching the game, just a quick glance at the screenshots which looked fine. But once I did, I could right away feel that something was off.

It seems that they fully depend on Unreal Engine 4 making this game look good by itself (which they pridefully boast about in all their games,) while having no idea how to take advantage of it. It doesn't matter how beautiful the graphics can be on this engine if you cannot construct anything interesting to look at.
To be fair, I didn't see everything this game had to offer, but if in the 1,5h of playtime they couldn't hook me on their visuals in any capacity (and they had to since this game doesn't have anything else going for it,) I'm going to believe the rest of the game looks equally uninteresting. Especially since some parts of it, like the character models, are just plain ugly (you probably shouldn't make all those close-ups of them.)
It didn't help that the arena mode (besides being boring and tedious,) consist of either one giant, empty wasteland, or a couple of walls forming a straight corridor and nothing else.

The only good thing I can say about this game is that the one track I've heard playing in the first world (I don't know if the other two worlds have different tracks, I couldn't stomach playing this game long enough to find out,) is pretty nice.
Too bad that the rest of sound design is either obnoxiously bad (like your attack producing ear-grating sound for the entire length of holding the button,) or nonexistent (no effects for walking, jumping, splashing in the water or even killing the enemies,) leaving the entire game to be incredibly unsatisfying to play.

And on top of all that, there are also some technical issues.
Constantly stuttering FPS; complete lack of controller support in the menus, forcing you to put it down and use a mouse every time you pause the game or a tutorial pops on the screen; collision with enemies causing the physics to break and launch either of you far away or high into the sky; and poor control of your floaty jumps, despite it being a precision platformer at some parts... just to name a few of them.

The entire thing just oozes of cheapness and it's hard to even call it a finished product.. 3д платформер - ты бежишь, бежишь, бежишь, собираешь фиолетовые кристаллы, прыгаешь, бежишь, собираешь бомбы, прыгаешь бежишь прыгаешь, прыгаешь, управление от третьего лица вносит свои правки - казалось бы элементарные задачи становятся интригующими, достаточно трудные - совсем трудновыполними - интересно.
ну и плюс футуристический вид главного героя, нереально фантастические миры, похожие на скриншоты с ноу мен скай, хорошая динамика - игра стоит своих денег.. On first sight this game looks very relaxing, with nice surroundings and a sweet soundtrack this is def. a run to finnish

https://www.youtube.com/watch?v=4rKVMZ-1qHc. The screenshots make it seem alot better than it is.. Not a bad little 3rd person platformer, I'm just not really into it. ***. never before played a game of this kind - third person runner.
